

SUMMARY

Aspiring SOC Analyst currently enrolled in the DEPI Information Security track with strong CCNA-level networking knowledge. Gained hands-on experience in network security, ethical hacking, threat detection, and SOC operations through practical labs and a cybersecurity internship. Skilled in TCP/IP, routing & switching, incident response, and Python basics, with a passion for protecting systems and mitigating cyber threats.

EXPERIENCE

Cybersecurity Intern

08/2025 - 09/2025

Advansys Intelligent Solutions

- Gained hands-on experience in Industrial Control Systems (IACS/OT) security concepts and risk mitigation strategies.
- Applied Defense-in-Depth principles, implementing Security Zones & Conduits using the Purdue Model to enhance system protection.
- Worked with network security technologies to improve system protection, monitoring, and incident response.
- Configured and managed Active Directory (users, computers, Organizational Units (OUs), and FSMO roles basics).
- Implemented Group Policies (GPOs) to enforce security settings and access control policies.
- Managed DNS services to ensure smooth internal network operations and secure DNS resolution.
- Performed Patch Management using WSUS to maintain system updates and reduce vulnerabilities.
- Deployed and configured endpoint protection solutions (both centralized and standalone) to safeguard systems.
- Practiced system hardening techniques, troubleshooting, and basic incident detection to ensure robust security posture.

EDUCATION

Faculty of Engineering

2023 - 2027

Helwan University - Bachelor of Science in Communication and Information Engineering

SKILLS

C++	Advanced	Network Security Tools	Intermediate
Network Protocols	Advanced	SIEM	Intermediate
Analytical Skills	Intermediate	Intrusion Detection/Prevention	Intermediate
Problem-Solving Skills	Advanced		

LANGUAGES

French	Basic	English	Fluent
Arabic	Native
