Summary

Cybersecurity enthusiast with hands-on experience in reverse engineering, digital forensics, and hardware hacking. Strong background in CTFs, penetration testing, and firmware analysis. Passionate about bridging academic knowledge with real-world security challenges through teaching and project-based learning.

Education

Helwan University, Faculty of Engineering *B.Sc. in Computer Engineering* Grade: Very Good Sept 2022 – Sept 2027

Experience

Digital Forensics Trainee	DEPI Jun – Dec 2025
- Completed a 6-month track focusing on file system analysis, network forensics, and anti-forensics. - Conducted malware analysis on the Zeus trojan and developed “GoMal,” a custom Golang tool for PE file inspection and packer detection, for the final project.	
Infrastructure Pentesting Intern	ZeroSploit MEA Aug – Sep 2024
- Conducted recon on Linux and Windows AD environments; exploited vulnerabilities using Metasploit and ExploitDB. - Practiced privilege escalation and lateral movement; documented findings in structured pentesting reports.	
Vice President	Pixels Egypt Jul 2024 – Present
Leading a 100+ member team; launched the AI-powered Pixels Profiling System and organized events reaching 1000+ students.	
Cybersecurity Instructor	IEEE Helwan SB Aug 2023 – Jun 2024
Delivered practical sessions on web hacking, PHP, and Linux; built CTF labs using TryHackMe, HackTheBox, and PortSwigger.	

Projects

ADIC – Anomaly Detection in Cybersecurity (<i>ML-based Detection System</i>)	github
Applied EDA, preprocessing, and ML to detect anomalies in system logs; achieved 99% accuracy on test data.	
Linux System Programming – Custom Shells	github
Developed micro/nano/pico/femto shells with built-in commands, I/O redirection, piping, and UNIX utilities.	

Certifications & Training

- **OSCP Preparation (Self-study):** [OSCP+2026 by MrLimbo](#) – Covered enumeration, exploitation, post-exploitation, and privilege escalation; progressed through to Active Directory (in progress)
- **RHCSA:** Red Hat Certified System Administrator – Completed with 93% score
- **TryHackMe:** 50+ modules (RE, Web, PrivEsc, Red Team); SOC Level 1 Path (in progress)
- **HackTheBox:** Intermediate-level user, several retired machines completed
- **SANS SEC617 & SEC560 (Self-study):** Wireless Ethical Hacking; Network Penetration Testing (in progress)
- **CCNA (Self-study):** Cisco Certified Network Associate

Technical Skills

Languages: Python, C/C++, Bash, Java, JavaScript, PHP, x86 ASM **Tools:** Ghidra, Burp Suite, Wireshark, Metasploit, binwalk, Docker, Linux

Focus Areas: Penetration Testing, Digital Forensics, Reverse Engineering, Firmware Hacking, Embedded Security

Honors & Activities

- 2nd Place – **CyberTalents COHORT3 Competition**
- Mentored junior students in CTF and security fundamentals
